

My Kid's Dentist Announces the Grand Opening of its Newest Office in Camarillo, CA

My Kid's Dentist is Designed to Provide Your Child with Excellent Dentistry in a Safe, Warm, and Fun Environment.

(Irvine, CA), (June 29, 2010) – [My Kid's Dentist](#), a leading provider in pediatric dentistry, is excited to announce the grand opening of its latest office in Camarillo. The office is located at 2370-D East Las Posas Road in the Camarillo Village Square, next to Albertsons.

My Kid's Dentist was designed to make children feel safe, calm, and carefree. The offices have been created especially for children. From watching their favorite movie during treatment, to toys in the waiting room, My Kid's Dentist has strived to create an atmosphere that leaves a lasting, positive memory. For the comfort of your child we offer sedation dentistry as well as General Anesthesia delivered by a Board Certified Anesthesiologist. This allows all treatment to be completed at one time with less stress on the parent and the child. Each handpicked staff member has a passion for children and their dental care. Our dentists have been educated at premier pediatric dental establishments and have committed their careers to the treatment of children.

Pediatric Dentists are the pediatricians of dentistry. A pediatric dentist has two to three years of specialty education after dental school and focuses his/her career on the treatment of children's dental needs.

"I treat each little mouth and tooth as if they belonged to my own child, and will take time and effort to set the stage for the most positive experience possible. Even though part of my job is to bust those cavity bugs, I strive to emphasize healthy hygiene and prevention from the youngest age." – Dr. Giancarlo Lauriente. His area of expertise lies in being the main provider for babies, toddlers, children and teens together with those with unique health requirements.

Along with having the right dentists, children's oral health is a priority for My Kid's Dentist. Primary or "baby" teeth not only help children speak clearly and chew naturally, they also aid in forming a path that permanent teeth can follow when they are ready to come in. The American Academy of Pediatric Dentistry recommends that children see a Pediatric Dentist after their first tooth shows or before their first birthday.

All new patients of My Kid's Dentistry receive a free electric toothbrush upon completion of Exam, Digital X-Rays and Cleaning.
